1	After creating an event, the app does not know take the user to the day/date that the event was created	Create Event	Help users recognize, diagnose, and recover from errors	2	It's be efficient to have the date/page change to the date of the added event for easier use of the app
2	Can not swipe to change day	Day View	Flexibility and efficiency of use	1	There should be an option to allow user to swipe right or left the change the day
3	Adding long text as event title cause issues in week's view	Week View	Aesthetic and minimalist design	1	After adding a long string of text as the event's title, the week view becomes very difficult to navigate as it causes the event to be very large - it'd be nice to wrap text
4	Unpleasing event tiles	Day/Week View	Aesthetic and minimalist design	1	All event titles are presented as caps - which is not as welcoming as lower case text
5	Issue with visibility of events	Overlapping Events	Visibility of system status	3	Some events over lap and can cause an event to be lost under multiple other events. user can not edit an event which is buried under multiple other events
Participant #2					
No.	Problems Identified	in which feature	Heuristic	Severity	Description
1	Viewing an Event using Month's view	Month View	User control and freedom Math between system and the real world	3	Allow user to click on date on calendar then view the events on that date.
2	Large black bar for hour long event	Day View	Consistency and standards Aesthetic and minimalist design	2	If user creates an event that is an hour long, the week view will show an unexpected black bar
3	Lack of a button that jumps to today's date	D/W/M View	User control and freedom	4	There should be a button in D/W/M view that takes user to today's date. If user presses the button in day view the app should jump to today's date and all the events
4	Difficulty reading the event names on overlapping events	Day/Week View	Consistency and standards	2	The font colour of the event name on overlay was difficult to read
5	Could not change family member's colour	Overlapping Events	User control and freedom	1	After pressing the overlay button, there is no option to change what colour the dad's or mom's event show i.e freedom of changing colours of all mom's events
Participant #3					
No.	Problems Identified	in which feature	Heuristic	Severity	Description
1	All day event doesn't go till 11:59 pm	Day View	Math between system and the real world	4	After creating an all day event - the event only appears from 12 am until 11:00 pm - leaving an hour gap
2	Week view cuts off Saturday's date	Week View	Math between system and the real world	2	The week view cuts of the date of every Saturday in the week. Possible fix: Make text smaller font
3	An all day event is not consistent when it's in editing mode	Editing Event	Consistency and standards	2	If an event is an all day event, once user is in editing mode, the checkbox becomes unchecked
4	Lack of simple design for buttons in create event	Create Event	Aesthetic and minimalist design	1	The confirm button's background should be green, delete event's background should be red and cancel should remain grey - this will allow for easier identification
5	Lack of access between user levels	Create/Edit Event	User control and freedom	2	Parents should be able to modify children's events however children can not modify parents' events. Parents should also be able to create an event for children
